Charles Dillinger

Profile

With more than 25 years of progressively responsible experience, I offer a distinguished career earmarked by accomplishments in information technology across broad disciplines, including engineering, designing data centers, operations, facility management, hardware, software, network, telecommunications, security, support, project management, vendor relationships and vendor management. Committed to forging and maintaining relationships that support and realize strategic goals. I strive to promote a culture of innovation, flexibility, integrity and unity to service goals that facilitate partnership between various Information Technology disciplines.

Work Experience

04/2008 – Present

IT Specialist – Data Center Management Design Lead - TD Bank Group

- Design Lead for Data Center Infrastructure and Design builds
- Responsible for providing guidance and co-ordination of trades
- Schedule, perform, and write-up site surveys when necessary
- Develop bill of materials and firm price quotes for infrastructure projects
- Write complex data center specific governance, policies, design and standards specifications
- Manage several large build projects simultaneously
- Regularly interfaces with customer representatives, team leads, subject matter experts, managers, data center technicians, construction contractors and field technicians
- Review equipment drawings, material spec sheets and white papers. Seek out information not readily available
- Initiate site visits and site surveys. Visit sites when necessary to solve design and build problems
- Prepare plans for development and installation according to present and future requirements
- Manage and perform research to design new advanced data center technologies
- Coordinate with IT business teams and help develop strategies to ensure achievement of data center capacity
- Maintain expert knowledge on all applications and its use on systems for various critical systems
- Comply with legal requirements following needs of current and new legislation along with regulations
- Responsible for developing and managing departmental budgets
- Oversees the development of data center standards, processes and procedures
- Manages customer relationships to ensure that service level objectives are developed and managed in all operational areas

01/2005 – 04/2008

- Develop and execute guidelines for furnishings building wide
- Manage furniture inventory for new purchases, maintenance and repair of existing furniture
- Develop project estimates, provide cost, schedule and scope information for management review and approval
- Prepare monthly occupancy status report and floor plans to management
- Maintain and manage physical asset and storage site inventory
- Inspect entire buildings to identify general corrective maintenance as necessary for proper maintenance and operation of various equipment, furniture and fixtures
- Report deficiencies and recommend areas for improvement to management
- Ensure to maintain and continue operation of mechanical systems like HVAC systems, boiler, fans, generators, electrical switch gear and UPS systems

Skill Sets

- Demonstrated ability to effectively lead technical teams and manage IT Projects
- Broad current knowledge of trends and IT best practices
- Well-developed communication, negotiation and client partnership skills
- Well-developed organizational skills, time management, prioritization and project management
- Effective interpersonal and communication skills
- Demonstrated team player with the ability to provide technical and management leadership
- Lateral thinker recognized for creative, conflict resolution and result driven problem solving approach
- Deliver projects on-time, on-budget while maintaining standards
- Broad knowledge of Telecommunications, Network, Storage, Distributed systems
- Work independently on deadline sensitive jobs or projects with little direction
- Read and understand site survey data, able to think through the information presented and quickly put together a bill of material with little guidance
- Fully adept at drafting and updating drawings and using drafting programs such as Visio and AutoCAD
- Takes an active role in teaching/coaching junior team members

Education

- IBDN 726 Fundamentals of Data Center Cabling
- IBDN 726 - IBDN Installation - Copper Training
- IBDN 749 - A Touch of Brilliance - Connectorizing Fiber
- IBDN 730 - IBDN Updates A non-stop evolution
- IBDN 002 – Optimized Data Centre Infrastructure
- IBDN 746 – Fiber Installation Course
- IBDN 726 – Copper Installation Course
- BICSI: Bonding and Grounding: Protect Your Vital Assets
- BICSI: Cabling and Managing the Evolving Data Center
- BICSI: Fiber-Optic Cabling for Next-Generation Applications
- BICSI: Standards for Cabling and Wireless Deployments
- BICSI: Cabling and Wireless Deployment Standards
- BICSI: Category 8 Developments
- BICSI: Wireless Technology and Trends in the Enterprise
- BICSI: Back to the Basics: Wireless LAN 101
- Belden Passive Optical Solutions
- Belden Grounding and Bonding Solutions
- Belden Take a closer look (Future and Trends)
- BICSI: Data Center Cabling and Infrastructure Planning
- BICSI: Cabling for the Customer-Owned Outside Plant
- BICSI: Standards, Practices and Cabling for Wireless LANs
- Business Technology: Implementing Lean in IT Infrastructure
- Corning EDGE, Unicam, Testing
- Corning Cable Systems - See the Light Training
- Autodesk AutoCAD
- Autodesk AutoCAD Architectural AEC
- Microsoft Certified Professional
- Certified Novell Administrator
- Networking Essentials TCPIP Protocols, LAN and WAN
- OS/390 Systems: JES, TSO, ACF
- Certified Teknion Modular Furniture Installer
- Occupational Health and Safety Training (WHMIS, Fall Protection, Ladder Safety)
- First Aid and CPR Training

Education (Internal)

- Leading and Managing People at TD
- Managing Year-End: People eComp Guide
- Managing Year-End: Tips for a Successful Process
- Managing Year-End: Writing Effective Performance Feedback
- Speaking to One to 1000
- Change Management Training (SDM 12.x)
- ITIL Foundations
